DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

In The Specification

The disclosure is objected to because of the following informalities: On page 1, lines 4-8 should be updated to reflect the current status of the parent application; on page 8, line 19, "the" should be deleted before "each"; on page 12, line 17, "an" should be changed to --a-- before "side"; on page 18, line 24, "form" should be --from--; on page 20, line 11, --to be-- should be inserted after "contemplated". Appropriate correction is required for the above objections.

The abstract of the disclosure is objected to because the abstract does not describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details. In particular, it appears that applicant is relying on the conversion assembly having in addition to the operative position and the stored position "a supporting position" in order to differentiate between the present application and the parent application. However, this feature is not present in the abstract. Correction is required. See MPEP § 608.01(b).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
